EDUCATION

George Mason University

Bachelor of Science in Computer Science

Fairfax, Virginia

Expected Graduation: May 2028

- **GPA: 3.7** | Dean's List (2024–Present)
- Relevant Coursework: Data Structures, Object-Oriented Programming, Computer Systems & Programming, Formal Methods and Models, Discrete Mathematics, Linear Algebra, Calculus III.
- **Certifications:** Machine Learning Foundations, Cornell University (Aug 2025); Web Development, CodePath.org (Apr 2025).

SKILLS

- **Languages:** Python, Java, JavaScript, TypeScript, C, C++, HTML/CSS
- **Frameworks & Libraries:** React.js, Node.js, Tailwind CSS, Scikit-learn, Pandas, Jupyter
- **Tools:** Git, GitHub, MongoDB, REST APIs, VS Code, Google Colab, Figma, Canva, Slack

EXPERIENCE

George Mason University — OSCAR

Website Specialist

Fairfax, Virginia

Nov 2025 – Present

- Led the product lifecycle and information-architecture redesign of the OSCAR platform, optimizing navigation and accessibility for 25,000+ undergraduate students.
- Drove a 37% increase in attendance for the Celebration of Student Scholarship expo by defining requirements and launching a new, conversion-optimized landing page.

Verizon

AI Tech Fellow

Remote

May 2025 – Dec 2025

- Built “Project Falcon” with a cross-functional team of 8 over a 15-week Break Through Tech / Verizon AI Studio fellowship (Cornell Tech): an end-to-end YOLOv8 system detecting birds, nests, and species on cell towers for wildlife protection and regulatory compliance.
- Merged and standardized 4 heterogeneous datasets (Roboflow, Hugging Face) into a unified YOLOv8 format, and built a ResNet50 “gatekeeper” classifier that filters images without towers before detection.
- Owned dataset integration, YOLOv8 training, and metrics analysis, reaching 95%+ nest-detection precision and demonstrating that data quality outweighed model complexity.

Ultatel

Software Engineering Intern

Herndon, Virginia

May 2024 – Aug 2024

- Improved user engagement 17% by redesigning the site's visual style with a new color palette and updated UI components in HTML/CSS.
- Developed and launched 5+ new website features using JavaScript and TypeScript, increasing user retention by 25%.
- Reduced production deployment errors by 30% through diligent testing and adherence to Agile practices and version control.

PROJECTS

BookNook: Literary Analysis

Full-Stack Engineer

Remote

May 2025 – Present

- Built a full-stack reading companion (29 React components; Node/Express + MongoDB) with 4 AI tools — literary analysis, motif detection, page-aware “Smart Recaps,” and a persistent Socratic-seminar chat; deployed on Google Cloud Run + Vercel with CI/CD.
- Integrated the OpenLibrary API, a server-proxied LLM, and a reading-metrics dashboard over a 4-state library workflow (Want-to-Read, Reading, Finished, DNF); secured accounts with JWT + Google OAuth.
- Engineered a MongoDB caching layer with conditional generation that regenerates AI content only when a reader's page advances, eliminating redundant LLM calls across all 4 tools and cutting API cost.

Wildfire Evacuation Threat Predictor

ML Engineer

Remote

Dec 2024 – May 2025

- Built a survival-analysis web app (Python, Streamlit, scikit-survival) that forecasts the probability of a wildfire reaching an evacuation zone at 12/24/48/72-hour horizons.
- Engineered 16 domain-informed features from first-5-hour fire telemetry (closing speed, area growth rate, ETA-to-threshold, directed-threat index).
- Ensembled a Random Survival Forest with a Gradient Boosting survival model, validating on real WatchDuty data via concordance index (C-index) and Brier-score calibration.
- Shipped it as an interactive Streamlit dashboard (Streamlit Community Cloud) that turns 6 real-time telemetry inputs into per-horizon threat scores and a triage-ready risk readout.

ACTIVITIES AND LEADERSHIP

George Mason — InternConnect

Web Developer & Digital Marketing Intern

Fairfax, Virginia

Feb 2025 – Jul 2025

- Developed and maintained a user-friendly website, increasing student engagement by 35% and improving career-resource accessibility.
- Managed the digital presence and optimized UI/UX and social media strategy, driving 80% growth in online interactions.
