EDUCATION

George Mason University

Bachelors of Science in Computer Science

Fairfax, Virginia

Expected Graduation, Dec 2027

- **GPA: 3.7 | Dean's List** (2024-Present)
- **Related Coursework:** Computing in Python, Object-Oriented Programming, Low-Level Programming, Data Structures, Calculus III, Discrete Mathematics, Formal Methods and Models, Computer Systems and Programming, Linear Algebra

Certifications:

- **Cornell University**, online certificate in Machine Learning Foundations (Aug 2025)
- **CodePath.org**, online certificate in Web Development (Apr 2025)

SKILLS

Programming Languages: Python, Java, JavaScript, HTML/CSS, TypeScript, C, C++

Frameworks & Libraries: ReactJS, Node.js, Tailwind CSS, Scikit-learn, Pandas, Jupyter Notebooks

Tools: Git, GitHub, VS Code, MongoDB, API Integration, Google Colab, Canva, Figma, Slack

EXPERIENCE

Verizon

Remote

AI Tech Fellow

May 2025 – Dec 2025

- Led a cross-functional team of 8 to deliver a computer vision solution for automated telecom infrastructure inspection, achieving 95% Top-5 model accuracy and directly addressing Verizon's corporate environmental compliance mandates.
- Managed the full 15-week software development lifecycle, translating broad requirements from 4 senior Verizon stakeholders into a functional prototype that replaced manual visual inspection workflows.
- Directed technical strategy for "Project Falcon," architecting a fault-tolerant data pipeline that processed 2,000+ images and reduced API data retrieval latency by 40% through custom caching logic.

Ultatel

Herndon, Virginia

Software Engineering Intern

May 2024 – Aug 2024

- Achieved 17% improvement in user engagement by redesigning the site's visual style using a new color palette and updated UI components with HTML and CSS
- Implemented enhanced functionality by developing and launching 5+ new website features using JavaScript and TypeScript, increasing user retention by 25%
- Facilitated smooth feature rollouts by coordinating development milestones with cross-functional teams through regular video conferences.
- Reduced production deployment errors by 30% through diligent testing and adherence to Agile practices and version control.

PROJECTS

Project Falcon

Remote

Lead Developer

Aug 2025 - Dec 2025

- Architected a scalable computer vision pipeline that automates regulatory compliance inspections for telecom towers, utilizing YOLOv8 for object detection.
- Implemented a custom "Confidence Gating" algorithm to filter low-quality inference results, raising system reliability to 95% Top-5 Accuracy on edge-case data.
- Engineered a fault-tolerant data ingestion module with local caching to handle high-volume image streams, effectively bypassing external API rate limits and reducing latency by 40%.

Secure Seniors

Remote

Team Lead

Dec 2024- May 2025

- Delivered 82% spam detection accuracy by developing a machine learning classification system using Python and Scikit-learn for 70+ senior citizens, preventing 500+ malicious emails
- Improved model performance by 25% by processing and cleaning 10,000+ email samples using data preprocessing techniques and feature engineering
- Reduced false positives by 60% and enhanced inbox safety by training classification models to identify various spam types and phishing attempts

ACTIVITIES AND LEADERSHIP

George Mason - InternConnect

Fairfax, Virginia

Web Developer & Digital Marketing Intern

Feb 2025 – Jul 2025

- Developed and maintained a user-friendly website, increasing student engagement by 35% and improving career resource accessibility.
- Designed and managed digital presence, optimizing UI/UX and social media strategy, leading to a 80% growth in online interactions.
- Facilitated job searches and industry connections, helping 500+ students gain access to career opportunities.
