SUMMARY

Computer Science undergraduate (B.S., George Mason, May 2028; 3.7 GPA, Dean's List) and full-stack software engineer with hands-on experience across **web, AI/ML, cloud, and mobile**. Fluent in **Python, Java, JavaScript, and TypeScript** with strong data-structures and algorithms fundamentals, has shipped tested, production software in fast-paced Agile teams—from a YOLOv8 computer-vision system to scalable cloud microservices serving real users. A curious, self-directed builder who turns open-ended problems into reliable, well-crafted software.

EDUCATION

George Mason University

Fairfax, VA

B.S. in Computer Science · **Expected May 2028** · GPA 3.7 · Dean's List (2024–Present)

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Low-Level & Systems Programming, Discrete Mathematics, Formal Methods and Models, Linear Algebra

Certifications: Cornell University — Machine Learning Foundations (Aug 2025); CodePath.org — Web Development (Apr 2025)

SKILLS

Languages: Python, Java, JavaScript, TypeScript, C++, C, HTML/CSS

Web & Mobile: React, Node.js, React Native, FastAPI, Express, Tailwind CSS, REST APIs, microservices

AI / Machine Learning: computer vision (YOLOv8), Scikit-learn, Pandas, OCR & LLM integration, prompt engineering

Cloud & Databases: Google Cloud (Cloud Run), Vercel, MongoDB, cloud-native deployment

Practices & Tools: Agile/Scrum, unit testing/QA, secure coding (JWT), code reviews, Git/GitHub, GitHub Copilot

EXPERIENCE

George Mason University — OSCAR

Fairfax, VA

Website Specialist

Nov 2025 – Present

- Own the product lifecycle and information-architecture redesign of a web platform used by **25,000+** students, improving navigation and accessibility.
- Launched a conversion-optimized landing page that drove a **37% increase** in event attendance.

Verizon

Remote

AI Tech Fellow

May 2025 – Dec 2025

- Led a cross-functional team of 8 through a 15-week Agile lifecycle to design, build, and test "Project Falcon," a **Python/YOLOv8** computer-vision system that replaced manual inspections.
- Engineered a custom confidence-gating algorithm that filtered low-quality inference, raising system reliability to **95%**.
- Architected a fault-tolerant, scalable data pipeline with caching to process **2,000+** images, cutting latency by **40%** and bypassing external API rate limits.

Ultatel

Herndon, VA

Software Engineering Intern

May 2024 – Aug 2024

- Designed, developed, and tested **5+** new features in JavaScript and TypeScript within an Agile team, increasing user retention by **25%**.
- Reduced production deployment errors by **30%** through testing/QA, code reviews, and version control.
- Rebuilt UI components and visual styling in HTML/CSS, improving user engagement by **17%**.

PROJECTS

Study Buddy Steve [GitHub ↗](#)

Full-Stack / AI / Cloud

- Engineered a full-stack platform (React, Node.js, Python FastAPI microservices) with an AI document-parsing pipeline (OCR + LLMs) that automates schedule extraction at **~90%+ accuracy**.
- Deployed independently scalable microservices (Vercel + Google Cloud Run) with JWT authentication and MongoDB Atlas, integrated via REST APIs.

Wildfire Evacuation Threat Predictor [GitHub ↗](#)

Machine Learning / Data

- Built a **Python** ML application on **10,000+** real-world records to triage risk and prioritize evacuations across 12–72-hour horizons.
- Trained Random Survival Forests and Gradient Boosting models (Scikit-learn), achieving a **0.85 C-index** with calibrated risk scores.

Eye Got You [GitHub ↗](#)

Mobile — React Native (iOS & Android)

- Developed a cross-platform mobile app (React Native, Expo, TypeScript) that manages complex multi-medication regimens through a clinical rules engine.
- Integrated on-device camera text recognition (MLKit) and barcode scanning with an accessible, dark-mode-first UI.

LEADERSHIP & COMMUNITY

Math Tutor, EduTutor — volunteer tutoring in 4th–6th grade mathematics

May 2026 – Present

Social Media Manager, GMU Computer Science Club — digital outreach & communications

June 2026 – Present

Web Developer (Volunteer), GMU InternConnect — React student-employer internship-matching platform

Feb 2025 – Jul 2025
